

## **Youth Housing and Schools**

**By Jocelyne V**

Youth go to school constantly

Learning things like English and Geometry

But how will those help teens in life?

How will it help them to survive?

What about writing resumes for job applications?

It's not like life will give them a lifelong vacation

What about paying bills?

Finding a job that fits?

Because without that

They will end up on the streets

No job to pay for a home and a family that won't provide

So many teens are homeless and struggling to stay alive

So why don't we change that and help them thrive

Change things in schools to help them survive

Change math classes from word problems to taxes

and bills

Feeding teens to help them get their fill

Help teens learn skills for the job they love

These things will help them get above
